

Ortho – County, State, and Federal Ownership and Distribution Rights – Samples

County Ownership and Distribution Rights

Each County will own and use without restriction the digital orthoimagery with 6-inch pixel resolution, and the digital surface model for their geographic area. Each County may display the images for their geographic area on any Internet application. Each County may distribute and/or sell the digital orthoimagery with 6-inch pixel resolution and the digital surface model according to its policies and pricing scheme. All income generated by each County through its distribution or sale of the digital orthoimagery described in this Section shall belong to each County.

SEMCOG's Ownership and Distribution Rights

SEMCOG will own and use without restriction the digital orthoimagery with 1-foot pixel resolution for the entire region. SEMCOG may display these images on any Internet application. SEMCOG may distribute and/or sell the digital orthoimagery with 1-foot pixel resolution according to its policies and pricing scheme. All income generated by SEMCOG through its distribution or sale of the digital orthoimagery with 1-foot pixel resolution shall belong to SEMCOG.

SEMCOG will have access to the digital orthoimagery with 6-inch pixel resolution, and the digital surface model for internal use only. SEMCOG has the authority to provide this data to any third party vendor who is doing work for them, as long as they abide by this data sharing agreement, and return the data at the end of the project.

Detroit Water and Sewerage Department

The Detroit Water and Sewerage Department will own and use without restriction the digital orthoimagery with 2-foot pixel resolution for the entire region. The Detroit Water and Sewerage Department may display these images on any Internet application and can be made available for free download. The Detroit Water and Sewerage Department may distribute and/or sell the digital orthoimagery with 2-foot pixel resolution according to its policies and pricing scheme. All income generated by Detroit Water and Sewerage Department through its distribution or sale of the digital orthoimagery with 2-foot pixel resolution shall belong to The Detroit Water and Sewerage Department.

The Detroit Water and Sewerage Department, including any department or agency authorized to do so (the City of Detroit) will have access to the digital orthoimagery with 6-inch pixel resolution, and the digital surface model for internal use only. The Detroit Water and Sewerage Department has the authority to provide this data to any third party vendor who is doing work for them, as long as they abide by this data sharing agreement, and return the data at the end of the project.

The State of Michigan's Ownership and Distribution Rights

The State of Michigan will own and use without restriction the digital orthoimagery with 2-foot pixel resolution for the entire region. The State of Michigan may display these images on any Internet application and can be made available for free download. The State of Michigan may distribute and/or sell the digital orthoimagery with 2-foot pixel resolution according to its policies and pricing scheme. All income generated by The State of Michigan through its distribution or sale of the digital orthoimagery with 2-foot pixel resolution shall belong to The State of Michigan.

The State of Michigan, including any State department or agency authorized to do so (the State) will have access to the digital orthoimagery with 6-inch pixel resolution, and the digital surface model for internal use only. The State of Michigan has the authority to provide this data to any third party vendor who is doing work for them, as long as they abide by this data sharing agreement, and return the data at the end of the project.

United States Geological Survey

The United States Geological Survey will own and use without restriction the digital orthoimagery with 2-foot pixel resolution for the entire region. The United States Geological Survey may display these images on any Internet application and can be made available for free download. The United States Geological Survey may distribute and/or sell the digital orthoimagery with 2-foot pixel resolution according to its policies and pricing scheme. All income generated by The United States Geological Survey through its distribution or sale of the digital orthoimagery with 2-foot pixel resolution shall belong to The United States Geological Survey.

The United States Geological Survey, including any department or agency authorized to do so (NGA) will have access to the digital orthoimagery with 6-inch pixel resolution, and the digital surface model for internal use only. The United States Geological Survey has the authority to provide this data to any third party vendor who is doing work for them, as long as they abide by this data sharing agreement, and return the data at the end of the project.
